

## STRATEGIC PLAN

---

After surveying over 600 people from the Community Library of DeWitt and Jamesville service area, the Library has determined community-led direction for strategic planning in the following 5 areas, outlining our strategic plan for 2023 to 2025.

### **Technology Resources for the community**

The Library will ensure continued growth of technological resources

### **Printed material continuation and growth**

The Library will support and add printed resources

### **Work towards increasing community accessibility to our building**

The Library will work towards efforts such as a bus route or other options

### **Enabling options to restricted members of the community**

Increase services to our homebound population

### **Broadening our role to our community**

New service to unreached groups, growth among current user groups

While we will be working to address the above issues that we share with our community, we will not neglect the core library services you have come to expect: “recreational resources” such as genre fiction, movies, and our gaming collections, and operational excellence in the way we meet your everyday needs.
